

MAKE ENERGY-SAVING UPGRADES A REALITY

Looking to reduce costs at your business? Atlantic City Electric's Energy Solutions for Business Programs offer a wide range of incentives and technical expertise for energy efficiency improvements designed to fit every type of business.

FIND THE RIGHT PROGRAM FOR YOUR BUSINESS

Prescriptive

No matter the type of business you have, Atlantic City Electric's Prescriptive Program offers incentives for a broad list of pre-qualified, standard equipment options that can help improve your facility's energy efficiency.

Eligible equipment includes:

- Lighting and controls
- Heating, ventilation, and air conditioning (HVAC) systems
- Variable frequency drives (VFDs)
- Commercial refrigeration and kitchen equipment
- Commercial clothes washers
- Specialized controls

Learn more about our Prescriptive Program and find a full list of incentivized equipment at atlanticcityelectric.com/Business.

Custom

The Custom Program offers financial incentives for more complex energy efficiency measures that the Prescriptive Program does not cover. Our energy experts will help you evaluate your business's needs and implement your vision.

Common custom measures include:

- Compressed air
- Refrigeration
- Data center equipment/servers
- HVAC/Chillers
- HVAC controls
- Motors/VFD
- Building improvements
- Process improvements
- Agricultural lighting/process
- Custom lighting

Learn more about the Custom Program offerings at atlanticcityelectric.com/Business.

Small Business Direct Install

For small businesses, nonprofit organizations, and local government buildings with an average peak kilowatt demand of 200 kW or less, the Small Business Direct Install Program is designed to help you achieve greater energy efficiency.

Program offerings include:

- On-site energy assessment at no additional cost to identify energy-saving opportunities
- Incentives that can cover up to 80% of the installed energy efficiency improvements
- Experienced, vetted, and approved contractors from our Trade Ally Network to complete the upgrades

Visit atlanticcityelectric.com/SmallBusiness to get in touch with our team of experts.

Energy Management

You don't have to replace equipment to optimize your building's performance. You can enjoy reduced energy costs by making improvements to existing systems through Atlantic City Electric's Energy Management Program.

Take advantage of incentives for:

- **HVAC Tune-Ups.** Get connected with qualified providers to re-tune your HVAC equipment and return it to its optimal operational state.
- **Full Building Tune-Ups.** Enhance your existing mechanical, electrical, and thermal systems and technologies with this retro-commissioning offering.
- **Monitoring-Based Commissioning.** Receive technical expertise to optimize your business's energy performance and receive alerts when your equipment is experiencing suboptimal functionality or efficiency.

Visit atlanticcityelectric.com/EnergyManagement to get started.

From mom and pop shops to large commercial real estate portfolios, Atlantic City Electric's energy experts will help identify the best Energy Solutions for Business Program based on your individual needs. Whether you need pre-qualified or custom measures, a building tune-up, or something else, we can connect you with the incentives, tools, professionals, and technical know-how to help you see better energy and cost savings, both now and in the long run.

Strategic Energy Management

The Strategic Energy Management (SEM) offering provides a holistic and systematic approach to continuous energy improvement for industrial customers. Through participation in SEM, Atlantic City Electric will provide customers with hands-on coaching, a no-cost energy assessment, a customized energy plan, support implementing improvements, and training to discover, assess, and improve their company's energy management practices—all at no additional cost.

Find a complete list of available training sessions at atlanticcityelectric.com/SEM.

Engineered Solutions

The Commercial and Industrial Engineered Solutions Program will provide tailored energy efficiency assistance to public service entities, such as municipalities, universities, schools, hospitals and other healthcare facilities, non-profit entities, and multi-family facilities. The program will provide expert-guided service to assist customers in identifying and undertaking large energy efficiency projects, while requiring no up-front funding.

Program participants receive:

- In-depth facility audit to identify potential energy efficiency upgrades
- Incentives, as determined on a project-by-project basis
- Design services, bid oversight, and construction administration for projects and upgrades

Visit atlanticcityelectric.com/Solutions for more information.

HOW TO SAVE FROM START TO FINISH*

Identify the right program for your project's needs or **discuss potential energy-saving opportunities** with an Energy Solutions for Business Program account manager by calling **1-833-ACE-PAYS** (1-833-233-7297).
